Journal's Performance

Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)

2024 JOURNAL IMPACT FACTOR

0.6

2024 JOURNAL IMPACT FACTOR WITHOUT SELF CITATIONS

0.4

Journal Impact Factor Trend 2024

Journal Impact Factor is calculated using the following metrics

Citations in 2024 to items published in 2022 (32) - 2023 (18)		50		
		=		= 0.6
Number of citable items in 2022 (41) + 2023 (45)		86		

Journal Impact Factor without self cites is calculated using the following metrics

Citations in 2024 to items published in 2022 (32) + 2023 (18) - Self Citations in 2024 to items published in 2022 (7) + 2023 (5)		50 - 12		
		=		= 0.4
Number of citable items in 2022 (41) + 2023 (45)		86		

Journal Impact Factor Contributing Items

Citable Items (86)

TITLE	CITATION COUNT
Sustainability of G20 Countries within Environmental and Energy Perspectives Authors: Gokgoz, Fazil;Yalcin, Engin Volume: 16 Accession number: WOS:000919350600003 Document Type: Article	5 
Minimizing the cost of energy consumption for public institutions in Nigeria Authors: Omeiza, Lukman Ahmed;Azad, Abul Kalam;Kozak, Kateryna;Mamudu, Ukashat;Daniel, Aikhonomu Osayemen Volume: 16 Accession number: WOS:000919349200001 Document Type: Article	3 
Social dimensions of resilience and climate change: a rapid review of theoretical approaches Authors: Qamar, Azher Hameed Volume: 17 Accession number: WOS:001028972900010 Document Type: Review	3 
Techniques for identification, mapping and analysis of grasslands. Case study: Arad county Authors: Simon, Mihai;Copacean, Loredana;Cojocariu, Luminita Volume: 16 Accession number: WOS:000907699100003 Document Type: Article	3 
An investigation into the influence of Public Green Spaces on the climate of Bengaluru Authors: Gopinath, Rajesh;Ramya, R.;Khan, M. Faraz;Masood, Shahid;Ranjan, Shantanu;Roy, Vivekbhushan Volume: 17 Accession number: WOS:001139584100006 Document Type: Article	2

Journal Citation Indicator (JCI)

0.19

The Journal Citation Indicator (JCI) is the average Category Normalized Citation Impact (CNCI) of citable items (articles & reviews) published by a journal over a recent three year period. The average JCI in a category is 1. Journals with a JCI of 1.5 have 50% more citation impact than the average in that category. It may be used alongside other metrics to help you evaluate journals. [Learn more](#)

Total Citations

167

The total number of times that a journal has been cited by all journals included in the database in the JCR year. Citations to journals listed in JCR are compiled annually from the JCR years combined database, regardless of which JCR edition lists the journal.

Citation Distribution

The Citation Distribution shows the frequency with which items published in the year or two years prior were cited in the JCR data year (i.e., the component of the calculation of the JIF). The graph has similar functionality as the JIF Trend graph, including hover-over data descriptions for each data point, and an interactive legend where each data element's legend can be used as a toggle. You can view Articles, Reviews, or Non-Citable (other) items to the JIF numerator. [Learn more](#)

Rank by Journal Impact factor

Journals within a category are sorted in descending order by Journal Impact Factor (JIF) resulting in the Category Ranking below. A separate rank is shown for each category in which the journal is listed in JCR. Beginning in 2023, ranks are calculated by category. [Learn more](#)

CATEGORY

Citation network

Cited Half-life

5.3 years

The Cited Half-Life is the median age of the items in this journal that were cited in the JCR year. Half of a journal's cited items were published more recently than the cited half-life.

Additional metrics

Eigenfactor score

0.00010

The Eigenfactor Score is a reflection of the density of the network of citations around the journal using 5 years of cited content as cited by the Current Year. It considers both the number of citations and the source of those citations, so that highly cited sources will influence the network more than less cited sources. The Eigenfactor calculation does not include journal self-citations. [Learn more](#)

Normalized Eigenfactor

0.02336

The Normalized Eigenfactor Score is the Eigenfactor score normalized, by rescaling the total number of journals in the JCR each year, so that the average journal has a score of 1. Journals can then be compared and influence measured by their score relative to 1. [Learn more](#)

Article influence score

0.064

The Article Influence Score normalizes the Eigenfactor Score according to the cumulative size of the cited journal across the prior five years. The mean Article Influence Score for each article is 1.00. A score greater than 1.00 indicates that each article in the journal has above-average influence. [Learn more](#)

5 year Impact Factor

0.5

The 5-year Impact Factor is the average number of times articles from the journal published in the past five years have been cited in the JCR year. It is calculated by dividing the number of citations in the JCR year by the total number of articles published in the five previous years.

5 year Impact Factor calculation

Citations in 2024 to items published in [2019-2023] (99)				
	=	$\frac{99}{208}$	=	0.5
Number of citable items in [2019-2023] (208)				

Immediacy Index

0.1

The Immediacy Index is the count of citations in the current year to the journal that reference content in this same year. Journals that have a consistently high Immediacy Index attract citations rapidly.

[Learn more](#)

Immediacy Index calculation
